Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/714,285

Applicant(s)

HORTALEZA ET AL. 

Examiner

Junghwa M. Im

Art Unit

2811

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 and 16-22 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 and 16-22 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 14 November 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 10/5/2004.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

Election/Restrictions

Applicant's election of claims 1-8 and 16-22 in the reply filed on July 29, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Objections

Claim 16 is objected to because of the following informalities. Claim 16 recites, for example, "an n metal layer" which should be an n-th metal layer. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 and 16-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Cohn et al. (US 6465882), hereinafter Cohn.

Regarding claim 1, Fig. 6 of Cohn shows a semiconductor package substrate comprising:

a first metal layer [32, 32a] adapted to receive a semiconductor die [75];

Art Unit: 2811

an underlying metal layer [30, 30a, 30b] configured for direct interconnections to the semiconductor die; and

a dielectric layer [22] between the first metal layer and the underlying metal layer, including a region of opening to uncover a portion of the underlying metal layer for the direct interconnection to the semiconductor die.

Regarding claim 2, Fig. 6 of Cohn shows that the direct interconnection is formed by at least one bond wire [80].

Regarding claim 3, Fig. 6 of Cohn shows that the opening region is free of the first metal layer for receiving the bond wires.

Regarding claim 4, Fig. 6 of Cohn shows that the underlying metal layer comprises a signal layer (col. 3, lines 32-35).

Regarding claim 5, Fig. 6 of Cohn shows the first metal layer comprises a ground plane [32a; col. 3, line 61].

Regarding claim 6, Fig. 6 of Cohn shows that the signal layer is sandwiched between a pair of the dielectric layers [20, 22].

Regarding claim 7, Fig. 6 of Cohn shows that the metal layers comprise copper (col. 2, lines 63-64).

Regarding claim 16, Fig. 6 of Cohn shows a packaged semiconductor device comprising:

an integrated circuit die [75]; and

a package substrate [10], wherein the package substrate further comprises:

a plurality of metal layers [30, 32, 34] separated by a dielectric layer [20, 22, 24]

comprising:

Art Unit: 2811

an n metal layer [32, 32a] to which the integrated circuit die is attached;
an n-1 metal layer [30, 30a, 30b] disposed on a side of the n metal layer opposing the integrated circuit die connected to the die by a plurality of bond wires [80];
an n-2 layer [34]; and
an n-3 layer [36 in Fig. 3].

Regarding claim 17, Fig. 6 of Cohn shows that the n-1 layer comprises a plurality of signal traces (col. 3, lines 32-35).

Regarding claim 18, Fig. 6 of Cohn shows that a ground plane [32a] is disposed above the signal traces

Regarding claim 19, Fig. 6 of Cohn shows that the signal traces are sandwiched between a pair of the dielectric layers [20, 22].

Regarding claim 20, Fig. 6 of Cohn shows that one of the pair of the dielectric layers [20] is a substrate core layer.

Regarding claim 21, Cohn discloses that the n-2 metal layer comprises a power plane (col. 4, lines 6-24). Note that Cohn discloses that cavities can be formed in more than one of the dielectric layers, thus exposing one or more conductive layers. And Cohn further discloses that connections for power can be provided in the cavity.

Regarding claim 22, Fig. 4 of Cohn shows that wherein the n-3 metal layer comprises a land layer [36].

Art Unit: 2811

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cohn in view of Hashemi et al. (US 6885561), hereinafter Hashemi.

Regarding claim 8, Fig. 4 of Cohn shows substantially the entire claimed structure except “the dielectric layers comprise bismaleimide triazine (BT).” Hashemi discloses a package substrate comprising dielectric layers made of bismaleimide triazine (BT; col. 4, lines 32-35).

It would have been obvious to one of ordinary skill in the art at the time of the invention was made to incorporate the teachings of Hashemi into the package substrate of Cohn in order to have the dielectric layers comprising bismaleimide triazine (BT) to utilize readily available dielectric material.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Junghwa M. Im whose telephone number is (571) 272-1655. The examiner can normally be reached on MON.-FRI. 8:30AM-5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eddie C. Lee can be reached on (571) 272-1732. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 2811

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
